

Eveline Leen

ABOUT EVELINE

Composing is one of Eveline Leen's greatest passions and there is always a link between her compositions and her private experiences, her journeys and the world of film. Her collaboration with various artists, writers and other musicians are an important source of inspiration.

Her compositions are characterized by an evocative power and each composition adds something new in theme and vision. Her work does not only possess a deep expressive meaning, but at the same time evokes a narrative structure that immerses the audience in a new emotional universe.

Over the past few years Eveline has been on stage with her own ensemble, playing her own compositions. She prefers unusual locations for her performances, such as castles, churches and historical buildings. She also organizes living room concerts, where a unique convivial atmosphere is evoked each single time.
